Layer Desk

An endlessly flexible mix-and-match desk system designed for longevity, replaceability, and material variety.

Clip-on panels can easily be fixed into place, creating a versatile frame that can house drawers, cupboards and other functional elements. This can then be dressed with a wide range of materials, creating near endless possibilities for aesthetic expression.

Its modular design allows for the easy replacement of panels, enabling users to update the desk’s aesthetics with new materials. This eliminates the need to purchase a completely new desk for a refresh. Panels are built for easy disassembly, allowing for end-of-life recycling or material reuse.

Product Design Consultant **Gensler**.

Key features

- CAD and BIM files available
- Easy to specify modular components
- Changeable clip on panels
- Handed to the left or right
- Three height options of 760mm, 950mm and 1100mm as standard
- DDA modules available
- Optional extras: integrated power, custom branding, LED skirting, sign-in platform, storage units, sit-stand adjustable worktop, infrared heater
- Various material and colour options available
- Available in 6-8 weeks (UK), 12-14 weeks (US)

Join Desk in Wood

Free-flowing in form, the award-winning **Join** desk seamlessly combines linear machined timber with soft curves. Subtle shadows created by the chamfered edge profile add visual depth, highlighting and celebrating the natural variations of the oak, ash and walnut profiles.

Key features

- Easy to specify modular components
- Three height options of 760mm, 950mm and 1100mm as standard
- DDA modules available
- Recessed branding, LED skirting, sign-in platform and storage units available as options
- Cable management included as standard
- Various colour options available
- Available in 6-8 weeks (UK) and 12-14 weeks (US)

Join Desk in Stone

Sinuously curved with a minimal aesthetic, **Join** creates fluid contours in stone. Each piece of stone is arranged for vein continuity while clean-lined shadow gaps between each element emphasise the desk's modularity. Tapered sections follow smooth curves, creating the illusion of an unbroken flowing form.

Key features

Easy to specify modular components

Cable management included as standard

Three height options of 760mm, 950mm and 1100mm as standard

DDA modules available

Recessed branding, LED skirting, sign-in platform and storage units available as options

Various colour options available

Available in 6-8 weeks (UK) and 12-14 weeks (US)

Mono

With a refined aesthetic, the modular elements of the award-winning **Mono** reception desk can be configured to make virtually any layout solution achievable. Highly flexible to suit individual project requirements, the desks in solid surface have a seamless, highly durable, impact-resistant finish, making them ideal for hardworking office, reception and public spaces.

Key features

Modular on specification, seamless on installation

Easy to specify modular components

Three height options of 760mm, 950mm and 1100mm as standard

DDA modules available

Translucent branding, LED skirting, sign-in platform and storage units available as options

Reception desks can be handed to the left or right

Cable management included as standard

Various colour options available

Available in 6-8 weeks (UK) and 12-14 weeks (US)

Blok Desk in Metal

With a minimal aesthetic, the elegant lines and angles of the **Blok** range of reception desks are specified for office and reception spaces of all sizes, from a selection of modular components which are installed as one highly finished piece. Available as part of the Isomi in Metal collection in lacquered hot rolled steel, copper and brass, the desks are perfectly suited to contemporary public spaces and reception environments.

Key features

Easy to specify modular components

Three height options of 760mm, 950mm and 1100mm as standard

CAD and BIM files available

Illuminated branding, sign-in platform and storage units available as options

Reception desks can be handed to the left or right

DDA modules available

Inset black matt laminate worktop, LED light trough and cable management included as standard

Made in authentic, hand-selected hot rolled steel, copper and brass

Available in 6-8 weeks (UK) and 12-14 weeks (US)

Blok

With a contemporary, minimal aesthetic, the clean lines and right angles of the **Blok** range of reception desks are specified for office and reception spaces of all sizes from a selection of modular components which are installed as one seamless, highly finished piece. As with all of our solid surface reception desks, **Blok** desks can be personalised with bespoke translucent graphics.

Key features

Modular on specification, seamless on installation

Easy to specify modular components

Three height options of 760mm, 950mm and 1100mm as standard

CAD and BIM files available

Translucent branding, sign-in platform and storage units available as options

Reception desks can be handed to the left or right

DDA modules available

LED light trough and cable management included as standard

Various colour options available

Available in 6-8 weeks (UK) and 12-14 weeks (US)

Fold

Made in solid surface, the **Fold** modular reception desk can be configured to suit all requirements. Robust and highly flexible and with a clean monochrome finish, elegant angles and a minimal, geometric aesthetic, the **Fold** desk is the ideal complement for any contemporary reception or public space setting.

Key features

Modular on specification, seamless on installation

Easy to specify modular components

Three height options of 760mm, 950mm and 1100mm as standard

CAD and BIM files available

Translucent branding, LED skirting, sign-in platform and storage units available as options

DDA modules available

Reception desks can be handed to the left or right

Cable management included as standard

Various colour options available

Available in 6-8 weeks (UK) and 12-14 weeks (US)

Kin

Comprising four distinct reception desk types to meet the requirements of a wide range of public and reception spaces, each piece in the **Kin** collection is fully equipped with an ergonomically-positioned sign in platform, cable ports and storage space. The collection is finished in solid surface material, with the option of personalised, backlit translucent graphics and signage.

Key features

Reception desks with unique, distinctive 3D contours

CAD and BIM files available

Translucent branding, LED skirting, sign-in platform and storage units available as options

Cable management included as standard

Various colour options available

Available in 6-8 weeks (UK) and 12-14 weeks (US)

Volume

With squared edges and an elegant aesthetic which resembles two intersecting forms, the **Volume** modular reception desk is a subtle solution for any public or reception space. As with all desks in the Concrete collection, the visual economy of **Volume**'s award-winning design belies a range of essential practical features.

Key features

Easy to specify modular components

Three height options of 760mm, 950mm and 1100mm as standard

Recessed branding, LED skirting, sign-in platform and storage units available as options

Reception desks can be handed to the left or right

CAD and BIM files available

DDA modules available

Cable management included as standard

Made in lightweight, stain-resistant concrete

Available in 10-12 weeks (UK) and 14-16 weeks (US)

Lintel

With a strikingly minimal form to reflect the architectural quality of the material, the **Lintel** modular reception desk exemplifies the linear rigour of the Concrete range. A truly modular solution for public and reception spaces, **Lintel**'s look is defined by clean lines and right angles.

Key features

- Easy to specify modular components
- Three height options of 760mm, 950mm and 1100mm as standard
- Recessed branding, LED skirting, sign-in platform and storage units available as options
- Reception desks can be handed to the left or right
- CAD and BIM files available
- DDA modules available
- Cable management included as standard
- Made in lightweight, stain-resistant concrete
- Choose light, mid or dark concrete with a smooth or raw finish
- Available in 10-12 weeks (UK) and 14-16 weeks (US)

Umi

Made in solid surface with optional oak storage and work surface, Umi lectern and greeters sit comfortably in any contemporary setting, either as an individual piece or in a series.

Available with castors Umi can also be customised with translucent branding.

Key features

No installation required

Castors, translucent branding and integrated screen available as options

Storage and work surface available in oak or solid surface

Cable management included as standard

CAD and BIM files available

Available in 6-8 weeks (UK) and 12-14 weeks (US)

Flo in Metal

Crafted in authentic hot rolled steel with a soft curve profile, **Flo** can be customised with oak interior seamlessly blending natural and industrial elements. **Flo** can be customised with oak worktop and storage pairing natural and industrial materials in harmony. Bespoke laser cut illuminated branding is also available.

Available with castors for placement flexibility, **Flo** does not require installation and is delivered ready to position.

Key features

No installation required

Castors, task light and illuminated branding available as options

Work surface supplied in black matt laminate as standard, oak worktop available as an optional extra

Storage available in black MDF and oak

Cable management included as standard

Made in authentic, hand-selected hot rolled steel

Available in 6-8 weeks (UK) and 12-14 weeks (US)

Flo in Wood

Free-flowing in form, **Flo** Lectern and Greeters in Wood seamlessly combine linear machined timber with soft curves. Subtle shadows created by the chamfered edge profile add visual depth, highlighting and celebrating the natural variations of the oak, ash and walnut profiles.

Supporting central placements, Isomi **Flo** lectern and greeter range benefits from a highly considered design concealing function within form allowing **Flo** to sit equally comfortably when placed as an individual piece or arranged in a series.

Key features

No installation required

Castors, task light and recessed branding available as options

Work surface in solid surface as standard

Storage available in Valchromat and oak

Cable management included as standard

Available in ash, oak or walnut

Available in 6-8 weeks (UK) and 12-14 weeks (US)

Linea

Produced in hot rolled steel with angled black MDF interiors, **Linea** can be customised with oak worktop and storage pairing natural and industrial materials in harmony. Bespoke laser cut illuminated branding is also available.

Available with castors for placement flexibility, **Linea** does not require installation and is delivered ready to position.

Key features

No installation required

Castors, task light and illuminated branding available as options

Work surface supplied in black matt laminate as standard, oak worktop available as an optional extra

Storage available in black MDF and oak

Cable management included as standard

Made in authentic, hand-selected hot rolled steel

Available in 6-8 weeks (UK) and 12-14 weeks (US)

Tejo Seating

A sofa system providing almost unlimited options, Tejo offers the freedom to either challenge or adhere to all types of spaces.

Tejo comprises three distinct main elements, each with a different depth: a bench, sofa with a back and a back-to-back sofa.

Each material used in the construction of Tejo is harvested from nature. Choosing cork, natural latex and wool and hemp fabrics, Tejo is built almost entirely from the ground up.

Key features

CAD and BIM files available

Easy to specify modular components

Depth: 600mm, 875mm or 1300mm

Optional extras: backrests, integrated power, planter, screen divider, table

Available fully upholstered or with exposed cork base

Natural latex

Various fabric colour options available

Available in 10-12 weeks (UK), 12-14 weeks (US)

Mono Seating

The **Mono** seating range is specified from a range of modular components, making it adaptable to meet the needs of any reception or public space. With a seamless finish, the elements in the collection comprise a thermoformed base in solid surface and a tailor-made seat, upholstered in premium fabric. The **Mono** seating is the ideal complement to the desks and table in the same range.

Key features

Modular on specification, seamless on installation

Easy to specify modular components

CAD and BIM files available

Various colour and fabric options available

Available in 6-8 weeks (UK) and 12-14 weeks (US)

Fold Seating

The **Fold** modular seating is produced in durable solid surface with a premium quality upholstered seat pad. Its lean, contemporary look belies a comfortable and practical finish. Highly versatile, the seating can be configured to meet a wide range of requirements. Also available in solid surface seat.

Key features

- Modular on specification, seamless on installation
- Easy to specify modular components
- CAD and BIM files available
- Various colour and fabric options available
- Available in 6-8 weeks (UK) and 12-14 weeks (US)

Moodlight Chair

Comfort meets well-being. The **Moodlight** chair features a seamless birch plywood shell and a natural wool upholstered backrest.

Integrated, adjustable light therapy aims to improve energy levels, sleep patterns, and mood, creating a haven for work, rest, or reflection.

Design by **Paul Crofts**.

Key features

CAD and BIM files available

Integrated LED moodlight

Birch plywood frame

Footrest available as an option

Various fabric colours available

Available in 6-8 weeks (UK) and 12-14 weeks (US)

Bench

The refined design of **Bench** is composed of a simple black MDF platform finished in matt lacquer; on the underside, a chamfered detail lends the piece a visual lightness. The bench's internal metal framework extends to two legs clad in stain-resistant cast concrete, and there is an optional open display box for documents and literature. **Bench** comes with modular upholstery with options for two or three seats and is designed to complement the **Chamfer** and **Stack** storage systems.

Key features

Made using black MDF

Lightweight, stain-resistant concrete legs

Adjustable feet

Various colour options available

CAD and BIM files available

Available in 6-8 weeks (UK) and 12-14 weeks (US)

Platform Table

Platform is designed for casual meetings, brainstorming sessions and breakout zones, offering a more agile work experience to help promote collaboration in the workplace.

Choose from fabric, hot rolled steel and solid surface screen dividers. Power integration also available.

Key features

- CAD and BIM files available
- Easy to specify modular components
- Available with two base options: central pedestal or legs
- Integrated power and media wall available as options
- 32" screen including PC
- Various materials and colour options available
- Available in 6-8 weeks (UK), 12-14 weeks (US)

Tejo Table

Tejo table is constructed almost entirely from recycled cork waste from wine stoppers.

The tinted glass top seamlessly integrates with the cork base, resting securely within a dedicated slot for a clean, minimalist aesthetic. Available in various dimensions to suit different needs, functioning as either a low coffee table or a tall side table.

Key features

CAD and BIM files available

Tinted glass top available in bronze or grey

Available in various dimensions

Available in 10-12 weeks (UK), 12-14 weeks (US)

Plus+ Table

The **Plus+** pedestal table is a versatile solution for a variety of functions. Available in four sizes, it can serve as a bistro table, side table, or laptop table with its off-centred stem. Available in a range of powder-coated base colours and a profiled plywood top. The Plus+ table's practical surface complements most seating options, making it ideal for casual work or breakout areas.

Key features

- CAD and BIM files available
- Various dimensions available
- Various powder coated colour options available
- Available in 4-6 weeks (UK), 10-12 weeks (US)

Fold Table

The geometric look and spare lines of the **Fold** coffee table are enhanced by the use of solid surface, and the option of a translucent black glass tabletop.

The table comes in two sizes and offers the perfect complement for the **Fold** modular seating range.

Key features

CAD and BIM files available

Various colour options available

Available in 4-6 weeks (UK), 10-12 weeks (US)

Mono Table

The minimal, refined look of the **Mono** Table makes it an ideal addition to any public or reception area. Produced in solid surface material, the table combines hard-wearing durability with a considered aesthetic. Available in three size options.

Key features

CAD and BIM files available

Various colour options available

Available in 4-6 weeks (UK), 10-12 weeks (US)

Void Table

Pared-back and contemporary in aesthetic, the **Void** table has the innovative feature of a recessed shelf made from thermoformed solid surface on which to store and display books, magazines and company documents. With the addition of a glass tabletop and a base made from powder-coated aluminium, **Void** provides a unique and highly functional focal point. Colour options are available on request.

Key features

CAD and BIM files available

Various colour options available

Available in 4-6 weeks (UK), 10-12 weeks (US)

Join Table in Stone

A versatile modular table formed from a 20mm-thick sheet of stone, supported by a timber frame clad in powder-coated or hot rolled steel (an all-timber option is also available). Chamfered edges and tapered legs offset the inherent heaviness of stone as a material, giving the table an unexpectedly lightweight silhouette.

The tapered metal underside of the table houses power and data points, and the modular design allows it to be expanded to fit the largest of boardrooms.

Key features

- Easy to specify modular components
- Available with a stone or timber tabletop with hot rolled steel or powder coated legs
- Integrated power included
- Available in 6-8 weeks (UK) and 12-14 weeks (US)

Join Table in Solid Surface

A versatile and modular table in solid surface.

The tapered underside of the table houses power and data points, and the modular design allows it to be expanded to fit the largest of boardrooms.

Available in a variety of solid surface colours tabletops and legs.

Key features

- Easy to specify modular components
- Integrated power included
- Available in 6-8 weeks (UK) and 12-14 weeks (US)

Outline

The **Outline** table is made from durable, repairable, long-lasting solid surface. Once the table has been specified from a choice of modular parts, including virtually unlimited length options, a meticulous focus on internal engineering allows for a seamless finished form with no visible joints. The table's inner workings include full cable management and the ability to be wired directly into the power source on installation, allowing users to plug their devices directly into the table.

Key features

Modular on specification, seamless on installation

Easy to specify modular components

CAD and BIM files available

Cable management included as standard

Various colour options available

Available in 6-8 weeks (UK) and 12-14 weeks (US)

Media Unit

The **Media Unit** is produced in solid surface, giving each piece a seamless, highly durable finish that is ideal for hardworking areas. Available in single or double form, these ergonomic units are exceptionally user-friendly and can support all IT packages, whether standard or bespoke.

Key features

32" IR touch-screen including PC as standard

CAD and BIM files available

Various colour options available

Available in 6-8 weeks (UK) and 12-14 weeks (US)

Slim Media Unit

Lean and angular, the **Slim Media Unit** represents a sleek new way to display screen-based information. Available in either floor-mounted or wall-mounted form, these pieces are finished in solid surface material and can display translucent or digital graphics.

Key features

- 22" IR touch-screen including PC as standard
- CAD and BIM files available
- Various colour options available
- Available in 6-8 weeks (UK) and 12-14 weeks (US)

Light Wall

Light Wall is a fixed wall cladding that can be customised with a variety of translucent patterns, with additional options including your company name, logo or message. Produced in solid surface material as a range of standard components for ease of specification and installation, **Light Wall** can be fitted in reception and public spaces of all kinds in a variety of shapes and sizes, for both permanent and temporary use.

Key features

- Modular on specification
- Easy to specify modular components
- CAD and BIM files available
- Bespoke patterns, logos, directory boards and LED lighting options available
- Available in 6-8 weeks (UK) and 12-14 weeks (US)

Metal Wall Panels

This modular system of wall panels in hand-selected hot rolled steel represents the successful application of a raw, unfinished industrial material in precise, minimal forms. Available as a continuous surface or with the option of an integrated shelf.

Key features

Made using authentic, hand-selected hot rolled steel

Easy to specify modular components

CAD and BIM files available

Optional integrated shelf

Available in 6-8 weeks (UK) and 12-14 weeks (US)

Stack

Stack is conceived as a modular stacking storage system, based on an innovative 'U'-shaped design in which each unit relies on the component above it to complete the system. The top unit is capped with a hot rolled steel plate.

Plywood timber offers a visual counterpoint to the unit's legs, base frame and doors in authentic hot rolled steel. The system is available in countless iterations, whether fully or partially open or closed, and with options for the display of documents, literature and artwork.

Key features

Metal elements made from authentic, hand-selected hot rolled steel

Timber elements made from plywood finished in a white lye and oil

Adjustable feet

Easy to specify modular components

Assisted soft door closures for ease of operation as standard

CAD and BIM files available

Available in 6-8 weeks (UK) and 12-14 weeks (US)

Chamfer

The simple yet refined **Chamfer** offers a highly flexible, interchangeable storage system formed of connecting modules which lock into a wider frame.

With a frame and doors in hand-selected hot rolled steel and legs cast in stain-resistant lightweight concrete, **Chamfer** benefits from a highly considered design which includes a chamfer detail and a shadow gap between the modules. Perforated hot rolled steel mesh is available as an optional infill to create a transparent backdrop to the storage modules.

Key features

Made using authentic, hand-selected hot rolled steel and black MDF

Lightweight, stain-resistant concrete legs as standard

Adjustable feet and shelves

Easy to specify modular components

CAD and BIM files available

Perforated hot rolled steel mesh infill panel

Cupboards can be handed to the left or right

Lockable doors available as option

Assisted soft door closures for ease of operation as standard

Various colour options available

Available in 6-8 weeks (UK) and 12-14 weeks (US)
