

Tejo

A sofa system providing almost unlimited options, **Tejo** offers the freedom to either challenge or adhere to all types of spaces.

Tejo comprises three distinct main elements, each with a different depth: a bench, a single sofa, and a double back-to-back sofa.

Each material used in the construction of **Tejo** is harvested from nature. Choosing cork, natural latex and hemp fabrics, Tejo is built entirely from the ground up.

Key features

Easy to specify modular components

Three depth options, 600mm, 875mm and 1300mm as standard

CAD and BIM files available

Available fully upholstered or exposed cork base

Various fabric colour options available

Available in 10-12 weeks (UK), 12-14 weeks (US)

How to specify

Tejo is a seating system that allows you to create the perfect piece by choosing from a host of individual modules and configurations. Modules come in three depths 600mm, 875mm and 1300mm. All modules within each size category are designed to be interchangeable.

Take a look at our predefined configurations. Add accessories such as privacy screens, planters, tables and power modules.

Step 1: Choose your depth

600mm, 875mm or 1300mm.

Step 2: Select your configuration

Choose from our recommended list of configurations or build your own by choosing from our different modules.

Step 3: Select your fabric

Select your fabric choice from our list of recommended fabrics.

Step 4: Select your optional extras and accessories

Select your optional extras and accessories such as power modules, planters, tables and privacy screens.

Warranty

Isomi soft seating carries a 5 year warranty. For further details please refer to our Terms and Conditions.

Maintenance

Maintaining a clean cork surface is essential for its longevity. Use CORKGUARD cleaner, ensure dryness, then apply undiluted maintenance base evenly for optimal protection.

For the Tejo cork seat to maintain its pristine appearance, we advise regular, gentle vacuuming. Should any spills occur, prompt blotting with an absorbent cloth is recommended. When using cleaning products, exercise caution and adhere to the manufacturer's guidelines.

Materials

Upholstery frame:	Cork
Upholstery:	Natural latex cushion
Wadding:	Lambs wool
Fabric:	Available in wide range of sustainable selected fabrics
Seat base:	Plywood formaldehyde free
Feet:	Ash wood

*Calculations are based on a standard middle module with backrest

Environmental Information

Our mission is simple, to create furniture of the highest standards in terms of design, quality and durability that enriches life today without compromising tomorrow.

To make Tejo, Isomi uses waste cork from the production of wine stoppers. Blocks of recycled cork are cut to size and shaped by hand. Waste is minimal, and any offcuts or dust generated in the process are simply returned to the beginning of the process and remade into cork blocks – a zero-waste production cycle.

The product does not contain surfactants. It is not based on PFAS, PFOA or PFOS chemistry and it does not degrade to these substances.

Tejo features a frame crafted entirely from 100% recycled cork bonded with a solvent-free binder. At the end of its life cycle, cork can undergo mechanical recycling to create new agglomerate or be composted to enhance soil quality.

Cork oak forests are biodiversity hubs, comparable in richness to rainforests. Maximizing the utilization of cork waste not only enhances the worth of this material but also promotes the conservation of cork oak forests.

Natural latex is ethically sourced from rubber trees, ensuring sustainability through harmless tapping methods. This provides a positive reduction in greenhouse gases. Natural latex offers unparalleled comfort as an upholstery filling, setting it apart from other traditional fillings.

Flax, hemp, and wool fabrics are both biodegradable and renewable. Flax, derived from plant fibres, offers durability with minimal water and pesticide use. Hemp fabric requires minimal resources and enriches soil health, while its versatility extends to various applications. Wool, a renewable and biodegradable material, provides natural insulation and odour resistance, reducing energy consumption and extending garment lifespans.

Fabrics

We offer a select range of fabrics that have been chosen for their sustainable properties as well as offering a choice of colours and textures.

MAINLINE FLAX - Mainline flax is made from all natural fibres, pure wool and flax, to create a multi-tonal, inherently flame-retardant fabric. 75% wool, 25% flax. Mainline Flax is certified to the EU Ecolabel and Indoor Advantage™ Gold.

MAINLINE TWIST - Mainline Twist is woven from a blend of wool and flax. It has a tweed effect textile with a handwoven appearance. Inherently flame-retardant fabric. 75% wool, 25% flax. Mainline Twist is Certified to the EU Ecolabel Indoor Advantage™ Gold. It is renewable and compostable and made from wool and plant fibre.

HEMP - Hemp is woven from a blend of pure wool and hemp. With a soft handle and inherent flame retardancy, this sustainable textile has a classic plain weave. 70% Virgin Wool, 30% True Hemp. Hemp is certified to the EU Ecolabel and Indoor Advantage™ Gold.

BLAZER -Blazer is a wool felt fabric made from premium New Zealand lambswool. It is natural and renewable, backed by an independently verified Environmental Product Declaration and certified to the EU Ecolabel.
