

# Layer Desk

An endlessly flexible mix-and-match desk system designed for longevity, replaceability, and material variety.

Clip-on panels can easily be fixed into place, creating a versatile frame that can house drawers, cupboards and other functional elements. This can then be dressed with a wide range of materials, creating near endless possibilities for aesthetic expression.

Its modular design allows for the easy replacement of panels, enabling users to update the desk's aesthetics with new materials. This eliminates the need to purchase a completely new desk for a refresh. Panels are built for easy disassembly, allowing for end-of-life recycling or material reuse.

Product Design Consultant **Gensler**.

## **Key features**

CAD and BIM files available

Easy to specify modular components

Changeable clip on panels

Handed to the left or right

Heights: 760mm, 950mm, 1100mm

DDA modules available

Optional extras: integrated power, custom branding, LED skirting, sign-in platform, storage units, sit-stand adjustable worktop, infrared heater

Various material and colour options available

Available in 6-8 weeks (UK), 12-14 weeks (US)

Layer can be specified in a combination of material types.

For worktops (1) choose solid surface or Fenix.

Storage units (2) are available in black MDF, white solid surface and Veneer.

Our interchangeable panel facades (4) are available in various materials and options; Solid Surface, Charred Wood, Fluted Timber, Fabric, Metal, Tile and Veneer. Transaction box and upstands (3) can also be specified in Solid Surface, Veneer, Hot-Rolled Steel and Aged Brass.

All finished with a black or white painted trim (5).

## Materials

### Worktop

Solid Surface

Fenix

### Front Panel Facades

Solid Surface

Charred Wood

Fluted Timber

Fabric

Hot-Rolled Steel

Aged Brass

Tile

Veneer

### Transaction Box and Upstand

Solid Surface

Hot-Rolled Steel

Aged Brass

Veneer
